PROFESSIONAL SUMMARY

Recently graduated Computer Science Engineer (B.Tech, 2026) with hands-on experience building full-stack, database-driven applications through two internships at Tata Technologies and a freelance product role. Skilled in REST API design, Python, and Agile development, with hands-on experience integrating AI/LLM APIs into real applications and a strong foundation in core CS concepts.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL
AI & Data: Python, Pandas & NumPy, LLM API Integration (OpenAI, Gemini), Prompt Engineering, Data Annotation, Model Training
Web Technologies: Node.js, Express.js, React.js, REST APIs
Databases: MySQL, MongoDB
Tools: Git, GitHub, Postman, VS Code
Core Concepts: OOP, DBMS, Agile/Scrum, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Software Engineering Intern · Tata Technologies — TENNECO Project *Feb 2026 – May 2026*
On-Site, Pune

- Designed and deployed backend automation systems using OOP principles and structured data flows to optimise real-time manufacturing processes in an industrial MES/SCADA environment.
- Built and maintained end-to-end automated test pipelines using Playwright; participated in code reviews with senior engineers demonstrating strong analytical skills and attention to quality.
- Collaborated with cross-functional teams in an Agile SDLC environment, interpreted complex technical requirements, and delivered clean, maintainable solutions within project deadlines.

Technical Product Owner (Freelance) · Osian Soft Con *Nov 2025 – May 2026*
Remote

- Managed product requirements and coordinated development for IPAAQ, a logistics and support platform handling invoice and PO (purchase order) management, while directly contributing hands-on code.
- Integrated an AI chatbot into the product; worked on data annotation and model training to improve response accuracy for logistics and support workflows.

Web Developer Intern · Tata Technologies Limited *Feb 2025 – May 2025*
On-Site, Jamshedpur

- Engineered backend REST APIs using Node.js/Express.js with OOP-structured service layers; implemented MySQL/PostgreSQL-backed operations for full complaint lifecycle management.
- Designed normalised relational database schemas and optimised queries for CRUD, filtering, and role-based data access — reducing query latency by 30%.

TECHNICAL PROJECTS

Intervyu AI — AI Interview Prep Platform *Node.js · Express.js · MongoDB · Gemini AI · REST APIs*

- Architected modular backend service layer using OOP design patterns; built REST API endpoints for AI inference, session management, and real-time performance analytics.
- Designed a question-answer evaluation pipeline with LLM integration; structured DB schema for user performance tracking, reducing interview preparation errors by 40%.

Smart Complaint Management System *Node.js · Express.js · React.js · PostgreSQL*

- Built a full-stack complaint management platform on a MERN-style architecture, using PostgreSQL in place of MongoDB, covering the complete complaint lifecycle from submission to resolution.
- Implemented REST APIs with role-based access control and normalised relational schemas for efficient complaint tracking, filtering, and reporting.

EDUCATION

B.Tech — Computer Science & Engineering 2022 – 2026
IILM University, Greater Noida | CGPA: 8.34

Class XII — DAV Public School 2021
CBSE | 90%

Class X — Baldwin Farm Area School 2019
CBSE | 89%

CERTIFICATIONS

Database Management Systems (SQL/DBMS), Artificial Intelligence, Agile Development | NPTEL: Ethical Hacking & Online Privacy

HOBBIES & INTERESTS

Watching Sports, Playing Video Games
